

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the Application:

Listing of Claims:

1. (Currently amended) An automatic hair washing device comprising;
  - a) a basin having a hollow interior,
  - b) a plurality of nozzle assemblies rigidly connected to the interior of the basin which nozzle assemblies are configured for spraying liquid onto the hair of the user of the hair washing device in rotating streams, wherein each of the nozzle assemblies is comprised of a rotating disc which rotates in the assembly as liquid is sprayed therefrom, and
  - c) a hood for covering the hair and ears of the user while exposing the face of the user which hood is connected to the basin.
2. (Currently amended) The automatic hair washing device of claim 1 wherein the liquid comprises ~~is selected from a group consisting of~~ water, shampoo, and/or hair conditioner.
3. (Cancelled)
4. (Previously presented) The automatic hair washing device of claim 1 wherein the rotating disc is comprised of a plurality of jets.
5. (Currently amended) The automatic hair washing device of claim 1 wherein the liquid is comprised of water and wherein the device further comprises a temperature control device ~~controller~~ for controlling the temperature of the water.
6. (Previously presented) The automatic hair washing device of claim 8 wherein the cover forms an elastic inner edge for covering the hair and ears of the user.

7. (Previously presented) The automatic hair washing device of claim 1 wherein the hood is hinged to the basin.

8. (Previously presented) The automatic hair washing device of claim 1 wherein the hood comprises a flexible face cover for covering the hair and ears of the user while exposing the face of the user.

9. (Currently amended) The automatic hair washing device of claim ~~1~~ 8 wherein the hood ~~is sized and configured to~~ comprises an outer edge having a soft sealing surface which forms ~~form~~ a water tight seal with a surface of the basin and with the neck of the user.

10. (Previously presented) The automatic hair washing device of claim 1 wherein the basin comprises an angled neck support configured to receive the neck of the user.

11. (Previously presented) The automatic hair washing device of claim 10 wherein a surface of the neck support is inclined at an angle of about 45 degrees from the horizontal.

12. (Currently amended) The automatic hair washing device of claim 11 wherein the neck support comprises a covering material ~~cover~~ which forms a liquid seal between the neck of the user and the covering material ~~basin~~.

13. (Currently amended) The automatic hair washing device of claim 12 wherein the covering material ~~neck support cover~~ is formed from a soft flexible material.

14.-20. (Cancelled)
